Windows Phone

A new Eclipse has come...

Eclipse 2 is powered by Windows Mobile 6.5, but unlike the old Eclipse, Eclipse 2 has Smart Touch UI, which enables users to switch themes easily whenever they like. This phone is fashioned to the more sophisticated consumers who want just a smart phone but a handset that complements their values to money, without sacrificing the quality. Hence, a Smartphone that understands the needs of a smart, "wise spender" user.

The Cherry Mobile Eclipse 2 is a user friendly handset powered by the latest Windows Mobile 6.5 platform, which enables the users to utilize applications that we normally see in a computer such as Office Mobile, Internet Explorer, and Facebook. For P9,999 you'll get to enjoy a feature-packed Windows Phone.

The Eclipse's touchscreen feature is very convenient to use. With its 3.2 inch wide WQVGA screen, it makes navigation of applications easy for users.

Like most of the Cherry Mobile products, Cherry Mobile Eclipse 2 Windows Phone has Dual SIM / Dual Standby capabilities that is perfect for people who have busy and demanding lifestyles. The ease of use and convenience without having to carry two mobile phones at the same time.

WiFi facilitates instant web browsing on WiFi hotspots which allows the users to send and receive emails, surf on various websites, or engage in IM (instant messaging) chats with friends.

The pre-installed Facebook Mobile application allows the user of the Eclipse 2 to update his/her status in real time. Met a famous celebrity that you want to share to your friends right away? No problem! Simply take a photo of him with the Eclipse's digital camera and upload the photo using Facebook Mobile. Your fan photo with the celebrity is instantly updated. Compared to other mobile phones, Facebook Mobile for the Eclipse lets the user upload pictures and videos at any time of the day, wherever they are.

Threaded Messaging is for easy reference since it allows the users to view their previous text message conversations with the same person in chronological order.

Microsoft MyPhone is an application which lets the users back up their phone contents. Just log on to the application and synchronize your phone files such as contacts, text messages, photos, videos, and other types of files. In case you lose your files (or your phone), Microsoft MyPhone has them all backed up for you.

The Eclipse is also equipped with GPS that makes navigation easier. A very reliable feature that can help the user identify his destination and even provides an alternative route.

Internet Explorer Mobile enables the users to browse websites and watch their favorite YouTube videos.

The 3.0 mega pixel camera of the Eclipse 2 enables users who have fast phased lifestyle experience entertainment in capturing special moments.

Tired of being tangled with your headphone's wires? With the Bluetooth A2DP feature, you can listen to your favorite MP3 tunes from your Eclipse 2 wirelessly with your Bluetooth Stereo Headset.

Since the Eclipse 2 has the capabilities of a Windows PC, this phone is also equipped with Office Mobile applications which make it possible for the users to read, create and edit documents in Word, Excel and PowerPoint. Save unlimited contacts and calendar entries and send or receive emails with Outlook Mobile.

The Windows Media Player makes the Eclipse 2 capable of playing MP3 files and full length videos.

FM radio is a good source of entertainment and information especially for the "people-on-the-go".

G-Sensor allows the user change the screen orientation from portrait to landscape by tilting the Eclipse.
